

PB100 RAIN TIGHT CONTROLS

SPEED CONTROLS

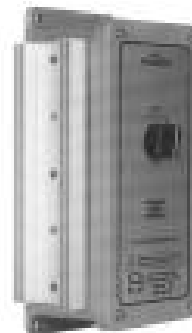

MANUAL FAN SPEED CONTROLS

Designed for use with PSC or split phase fan motors, the manual speed controls have an internal low speed adjustment. The knob is sealed through the cover for moisture and dust protection and sets the control in off, high and variable low speed settings. Color coded wires assure safe and easy connections.

VARIABLE SPEED CONTROL

These manual variable motor speed controls are designed for heavy duty service and can adjust fan motor speed from near 20 to 100 percent full speed with soft starting to eliminate high starting currents.

Model	PB100MSC115	PB100MSC230
Type	Manual - Off, High, Variable Low	
Rating	6 AMP	
Voltage	115VAC	230VAC

Model	PB100VSC-1
Type	Manual Variable
Outputs	One 16 Amp Channel
Voltage	120 or 240 VAC Jumper Select

MOTOR LOADS - NUMBER OF FANS						
HP	SINGLE CHANNEL		DUAL CHANNEL			
	120 VAC	240 VAC	120 VAC		240 VAC
